Portfolio: https://my-portfolio-olem90.netlify.app/
(More contact details and links to my professional profiles are available on my portfolio website.)

Objective
Passionate front-end developer with a robust foundation in HTML, CSS, JavaScript, and React, showcased through detailed projects on my portfolio website.
My site also ~~serves as a central hub for all~~ my professional profiles, including LinkedIn, Discord, and GitHub, offering a holistic view of my online presence.
Eager to contribute to a dynamic team to deliver impactful web experiences.

Skills
Languages: HTML, CSS, SASS, JavaScript
Frameworks/Libraries: React, Bootstrap
Tools: Git

Education
Front-End Development Certificate
Noroff School of Technology and Digital Media
[Waiting for my certificate]

Projects
Here are a few select projects I've developed. For comprehensive details and more examples of my work,
please visit my online portfolio at https://my-portfolio-olem90.netlify.app/
.

Javascript Framework 2:
This React-based project entails building an eCom store featuring product browsing, detailed item descriptions, a cart system, and a checkout process. The site includes a searchable product listing, a user-friendly cart interface, and a contact page with form validation, offering an efficient and engaging online shopping experience.

Holidaze:
My final exam introduces a newly launched accommodation booking site, that has tasked us with developing a modern front-end application. This project has both

customer-facing and admin-facing sides, enabling users to book holidays and manage venues and bookings.

Users who are not registered can still browse and search for venues. However, signing in is a prerequisite for booking venues. Additionally, only users registered as venue managers have the capability to create, update and delete their own venues.
